PROFESSIONAL SUMMARY

Passionate and self-taught Flutter Developer with a strong foundation in Dart, Experienced in building responsive mobile applications with robust state management and seamless API integrations. Also skilled in 2D game development using Godot. Highly motivated.

TECHNICAL SKILLS

- **Programming Languages:** Dart, C++, Python, GDScript
- **Frameworks & Technologies:** Flutter, Godot Engine
- **Flutter Skills:** API integration (Dio, HTTP), Local Storage (Hive), Clean Architecture, BLoC / Cubit
- **Office Skills:** Word, Excel, PowerPoint
- **Soft Skills:** Problem Solving, Effective Communication, Self-Directed Learning, Analytical Thinking

PROJECTS

To-Do List Application | *Flutter, Dart, Hive*

- Developed a fully functional task management mobile application with an intuitive user interface.
- Implemented local database storage using **Hive** for fast and efficient offline data persistence.
- Built dynamic features including Light/Dark mode, adding/editing tasks, scheduling with time selection, and time-based task sorting.
- Created distinct pages for active tasks and completed tasks to improve user experience.

Ancient Egypt: Bat Curse (2D Game) | *Godot, GDScript*

- Designed and developed an interactive 2D platformer game set in an Ancient Egyptian theme.
- Programmed an innovative echo-location vision system to navigate through the game levels.
- Engineered a complex, unpredictable trap system (inspired by "Level Devil") to challenge players and enhance gameplay mechanics.

EDUCATION

High School (2nd Secondary Grade) | Ministry of Education, Egypt Expected Graduation: 2026/2027

Note: Self-taught software developer, acquiring advanced programming skills through independent study and practical project building.

AWARDS & ACHIEVEMENTS

10th Place Winner - Micro Jam 32 | *Itch.io*

- Secured 10th place in a competitive international game development hackathon.
